Multiflora Hyacinths

By a special cultural treatment in Holland, Hyacinth bulbs can be grown which will produce from 6 to 10 excellent flowers on one bulb. If you would like to grow bulbs in the house, here is an opportunity you must not overlook. They are easily grown in bulb fiber or soil. Each bulb will come carefully packed in a small box, with cultural directions.

The informal, dainty gracefulness of the plant in bloom appeals to everyone and is especially attractive to those who have considered the ordinary Hyacinth rather stiff and formal. They can be supplied in Pink, White, Blue and Yellow.
